EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science and Engineering, Core.

CGPA: 8.24/10

2022 - 2026

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Mongoose, Bootstrap, Tailwind CSS, Framer Motion, shadcn/ui
- **Databases:** MongoDB, Firebase
- **Tools:** Git, GitHub
- **Computer Science Fundamentals:** Object-Oriented Programming (OOP), Operating Systems, DBMS
- **Cloud & Deployment:** PartyRock, Vercel

PROJECTS

AuraTravel - AI Powered Trip Planner [🔗](#)

2026

Tech Stack: React.js, Node.js, Express.js, Firebase, Tailwind CSS, shadcn/ui, Gemini API

- Developed a full-stack AI-powered travel planning platform that generates personalized itineraries based on user inputs such as location, budget, number of travelers, and trip durations
- Integrated Google Gemini AI to dynamically generate structured travel recommendations and return optimized itineraries in JSON format for seamless frontend rendering
- Implemented a Splitwise-style bill splitting feature allowing friends to track shared trip expenses and automatically calculate individual balances
- Built responsive UI components using React, Tailwind CSS, and shadcn/ui, while developing backend APIs with Node.js and Express for handling travel data and user interactions

FitnessTrack Master [🔗](#)

2025

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Developed a fitness tracking web application that enables users to monitor workouts, track progress, and analyze performance throughout their fitness journey
- Built interactive front-end components using React.js to display workout logs, progress metrics, and user activity in a clean and responsive interface
- Integrated MongoDB with a Node.js and Express backend to store user data, manage workout records, and support efficient data retrieval for progress tracking

Stress Monitoring System [🔗](#)

2025

Tech Stack: React.js, Python, ESP32, MAX30102, DS18B20, MongoDB

- **Designed** a real-time health monitoring system that collects physiological data including heart rate, SpO2, and body temperature using IoT sensors
- Built a live web dashboard to visualize real-time sensor readings and trigger alerts for abnormal health patterns

SCHOLARSHIPS

Next Generation Tech Booster Scholarship

2024

Udacity — Bertelsmann Foundation

- Selected among the **top 1% globally** for Udacity's **AI Programming with Python Nanodegree**, fully sponsored by Bertelsmann
- Completed the intensive **AI Programming with Python Nanodegree** program within a **2-month period**
- Applied Python-based AI concepts to design and develop a real-world **capstone** project

CERTIFICATIONS

- **Python Course for Beginners With Certification: Mastering the Essentials**, [Link](#)

Mar 2026

LEADERSHIP AND CAMPUS ENGAGEMENT

Event Management Lead, Marathi Club, Vellore Institute of Technology

2024 - 2025

- Managed logistics and operations for the annual Ganpati Festival, serving an attendance of 1000+ students
- Coordinated a 2-day cultural event, managing a team of 15 volunteers and all scheduling

ACHIEVEMENTS & ACTIVITIES

- **Top 15% Global Ranking on [Leetcode](#)** with solving **450+ DSA Problems**
- **Hobbies:** Reading books on self-development, playing basketball and cricket to build teamwork and strategic thinking, and maintaining fitness through regular running.
- **Volunteer Work:** Active Member at Tej Gyan Foundation, contributing to value-based learning, community awareness initiatives, and programs promoting mindfulness and social well-being.
