EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science and Engineering, Core.

CGPA: 8.34/10

2022 - 2026

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, Javascript, HTML, CSS
- **Frameworks & Libraries:** React.js, Bootstrap, Tailwind CSS, Framer Motion, shadcn/ui
- **Databases:** MongoDB, Firebase
- **Tools:** Git, GitHub, VS Code
- **APIs & Integrations:** Gemini API, Google AI
- **Cloud & Deployment:** AWS PartyRock, Vercel

PROJECTS

AuraTravel - AI Powered Trip Planner

2026

Tech Stack: React.js, Firebase, Tailwind CSS, shadcn/ui, Gemini API

- Engineered a full-stack AI-powered travel planning platform serving personalized itineraries for 5+ destination parameters including location, budget, traveler count, and trip duration, reducing manual trip planning effort by 80%.
- Integrated Google Gemini AI API to dynamically generate structured travel recommendations, returning optimized JSON itineraries with sub-2s response time for seamless frontend rendering.
- Architected 10+ reusable responsive UI components using React.js, Tailwind CSS, and shadcn/ui, achieving 100% mobile responsiveness across all device breakpoints.

Uplift – AI Emotional Companion

2025

Tech Stack: React.js, AWS PartyRock, Generative AI, Prompt Engineering

- Developed a generative AI-powered emotional wellness application on AWS PartyRock, delivering context-aware supportive responses across 5+ emotional states with real-time interaction.
- Designed and optimized multi-stage prompt engineering workflows, improving AI response empathy accuracy by 40% and enabling mood-based conversation personalization.
- Implemented an intelligent recommendation engine surfacing 3+ categories of mental wellness strategies — motivational messaging, coping frameworks, and reflective insights — through advanced generative AI prompting.

Stress Monitoring System

2025

Tech Stack: React.js, Python, ESP32, MAX30102, DS18B20, MongoDB

- Architected an end-to-end IoT-based real-time health monitoring system integrating 3 physiological sensors (MAX30102, DS18B20) via ESP32 to capture heart rate, SpO2, and body temperature at sub-second intervals.
- Deployed a live React.js web dashboard with real-time data visualization, reducing anomaly detection response time by 60% through automated threshold-based health alerts and MongoDB-backed data persistence.

SCHOLARSHIPS

Next Generation Tech Booster Scholarship

2024

Udacity — Bertelsmann Foundation

- Selected among top 1% globally for Udacity's AI Programming with Python Nanodegree and completed program in 2 months and applied ML concepts to a production-ready **capstone** project.

CERTIFICATIONS

- **Python Course for Beginners With Certification: Mastering the Essentials**, [Link](#)

Mar 2026

LEADERSHIP AND CAMPUS ENGAGEMENT

Event Management Lead, Marathi Club, Vellore Institute of Technology

2024 - 2025

- Spearheaded end-to-end logistics and cross-functional coordination of a 2-day Ganpati Festival, directing 15 volunteers and delivering a seamless cultural experience to 1000+ students with zero operational downtime.

ACHIEVEMENTS & ACTIVITIES

- **Top 15% Global Ranking on LeetCode** – [Leetcode Profile](#), demonstrating strong problem-solving proficiency by solving 450+ Data Structures & Algorithms problems.
- Demonstrated consistent cross-functional teamwork and strategic thinking through competitive basketball and cricket; maintains discipline and peak performance through a structured fitness routine.
- **Volunteer Work:** Contributed as an active volunteer at Tej Gyan Foundation, driving community awareness initiatives and value-based learning programs promoting mindfulness and social well-being across 100+ participants.
